Agents:

Noboru Tajigome and 1 other

[There are no amendments to this patent.]

### Claims

1. A hanger with a laundry net characterized by the fact that in a hanger with a laundry net comprised of a hanger for hanging the clothes that are to be washed and a laundry net which accommodates the clothes hung on the hanger, there is a hanger attachment means comprised of a removable grip part which is fitted to the hanger from the outside at the circumferential surface of the hanger and a coupling part which couples the grip part and the laundry net.

2. A hanger with a laundry net noted in Claim 1, in which the grip part is composed of a ring-shaped member capable of deforming and being restored, and the ring-shaped member has an opening in which the constitutional wall of the ring-shaped member is cut at a prescribed width in the center axial direction of the ring-shaped member.

3. A hanger with a laundry net noted in Claim 1 or 2, in which the laundry net side end of the coupling part is fixed to the laundry net.

4. A hanger with a laundry net noted in Claim 1 or 2, in which a removable coupling means which is hooked to the laundry net is provided to the laundry net side end of the coupling part.

5. A hanger with a laundry net noted in Claim 1, in which the main body material of the hanger is composed of a cylindrical body in which the two ends are opened.

6. A hanger with a laundry net noted in one of Claims 1-5, in which the main body of the hanger expands in the longitudinal direction.

7. A hanger with a laundry net noted in one of Claims 1-5, in which the main body of the hanger is foldable.

8. A hanger with a laundry net characterized by the fact that in a hanger with a laundry net comprised of a hanger for hanging the clothes to be washed and a laundry net which accommodates the clothes hung on the hanger, there is a hanger attachment means comprised of a coupling part in which one end is fixed to the hanger and the removable end is hooked to the laundry net.

9. A hanger with a laundry net noted in Claim 8, in which the main body material of the hanger is composed of a cylindrical body in which the two ends are opened.

10. A hanger with a laundry net noted in Claim 8 or 9, in which the main body of the hanger for the laundry net expands in the longitudinal direction.

11. A hanger with a laundry net noted in Claim 8 or 9, in which the main body of the hanger is foldable.
